

OUR GOALS...

The goal of our Preschool is to provide a nurturing Christian atmosphere for children ages 2 1/2 – 5 years of age.

The preschool classes provide developmental, age appropriate activities in a non academic settings.

Positive self growth is the major focus at all levels. Exposing students to the community as a whole is a special feature of our school. To achieve this objective, field trips are planned where the children learn from the community and also give to the community in return. To facilitate this, parental involvement is encouraged and expected! Without parental reinforcement, much of our teaching/learning is ineffective or lost! We need parents to be an active partner in our school.

Gross motor movement is an important facet of our program, both in the classroom and developed through independent outdoor play. Unless weather is extremely inclement, all children are expected to go outside and have appropriate attire.

Children participate in Music two times a week and Spanish once a week. These special classes enhance our weekly themes. The three and four year old classes perform for their families and friends in several programs.
